

ABSTRACT OF THE DISCLOSURE

Disclosed is a grease composition comprising a base oil, a thickener, and an additive; the base oil having a kinetic viscosity of 20 to 150 mm²/s at 40°C, and the additive containing as an essential component 0.05 to 10 parts by weight of a metal salt of a dibasic acid based on 100 parts by weight of the base oil and the thickener, the metal salt of the dibasic acid being represented by the following formula:

where M₁ and M₂ represent the same or different alkali metal, and R₁ represents aliphatic hydrocarbon group or an aromatic hydrocarbon group.
